

| Gasmax II Options for sensor type - % LEL detection | Initial Product Cost | Sensor Warranty | Average Life | Replacement Sensor Cost |
|---|-----------------------------|---------------------------|---------------------|--------------------------------|
| Gasmax II with Catalytic Bead sensor & Integral Relays | \$1,525 | One Year | 24 months | \$295 |
| Gasmax II with Non-Dispersive Infrared sensor & Integral Relays | \$1,925 | Two Years | 48 months | \$775 |
| Gasmax II with Open Path Infrared detector & Integral Relays | \$2,830 | Five Years / Twelve Years | 15 years | \$1,695 |

GDS-IR Detector has a 5 year operational warranty
and a Twelve year warranty on the IR Source

| Cost of Ownership Calculation - 15 year service life | Initial Product Cost | Number of replacement sensors | Replacement Sensor Cost | Sensor Cost - 15 years | Total Life Cycle Cost |
|---|-----------------------------|--------------------------------------|--------------------------------|-------------------------------|------------------------------|
| Catalytic Bead sensor | \$1,525 | 8 | \$295 | \$2,360 | \$3,885 |
| NDIR Sensor | \$1,925 | 4 | \$775 | \$3,100 | \$5,025 |
| GDS-IR Detector | \$2,830 | 0 | \$1,695 | 0 | \$2,830 |

Note: Calibration gas and maintenance times not included
in this calculation. Only hardware reviewed in these numbers
